TECH STACK

One Platform, **Every Mandate.**

Hissado consolidates your entire consulting operation into a single bilingual platform.

Internal Staff Workspace

Complete tools for consulting teams — projects, services, tasks, team management, and reporting.

- Projects and mandates lifecycle
- Services and task management
- Analytics and financial reports

Client Portal

Secure client-facing portal with real-time project visibility, communication, documents, and billing.

- Real-time project dashboards
- Document and file sharing
- Invoice and payment tracking

Bilingual and PWA

Full EN/FR interface with Progressive Web App capability — install on any device, works offline.

- Complete EN / FR translation
- Install on desktop and mobile
- Offline-capable and responsive

Dashboard and Intelligence

The command center for your entire consulting operation — all KPIs, timelines, and team status at a glance.

-  **Real-time KPIs and Statistics**
Live project counts, billing status, and team metrics
-  **Project Timeline Tracking**
Milestones, phase progress, and deadline visibility
-  **Team Capacity Overview**
Workload distribution and availability per staff
-  **Revenue Pipeline**
Invoices, billing status, and revenue forecasting
-  **Activity Feed**
Recent updates, changes, and platform events

LIVE DASHBOARD

Projects and Services

Full mandate lifecycle management alongside client service delivery and estimation workflows.

Project Lifecycle

Mandate creation, phase tracking, milestone management, and budget control from start to close.

- Phase and milestone tracking
- Budget and cost monitoring
- Client-linked mandate portal

Service Requests

Client-initiated services with approval workflows, scoping, and professional estimation and quoting.

- Approval workflow engine
- Scope and estimate builder
- Client acceptance tracking

Task Boards

Kanban-style task management with assignees, priority levels, due dates, and status workflows.

- Kanban and list views
- Priority and deadline alerts
- Multi-assignee support

Time Tracking

Billable hours logging, expense tracking, timesheet approvals, and payroll export capabilities.

- Billable vs non-billable hours
- Manager timesheet approvals
- Expense and cost capture

Team and Client Management

Manage your internal staff hierarchy and deliver a premium client experience through the dedicated portal.

INTERNAL STAFF ROLES

Superadmin

Full platform control and configuration

Admin

Oversight, settings, and team management

Manager

Project and team coordination

Employee

Task execution and progress reporting

Invoice #2048 sent to client — awaiting approval.

You

Meeting scheduled for tomorrow at 10:00 AM.

Standup — Tomorrow, 10:00 AM

Join

Centralize documents, coordinate schedules, and generate professional insights — all in one workspace.

Files, Calendar and Reports

File Management

Centralized document repository with version control, folder organization, and client-shared file access.

- Version history and rollback
- Shared folders with clients
- Search and tag filtering
- Permission-based access

Smart Calendar

Project milestones, team schedules, client meetings, and deadline tracking with iCal sync support.

- iCal and Google Calendar sync
- Deadline and milestone alerts
- Multi-project timeline view
- Team availability overlay

Reports and Analytics

Project performance, team productivity, revenue summaries, and exportable reports in PDF and Excel.

- Revenue and billing reports
- Team productivity analytics
- Export to PDF and Excel
- Custom date range filters

Tickets and Help Desk

A structured support system that manages client and internal requests from intake through to resolution.

Ticket Intake

Client or staff ticket submission with categorization, priority assignment, and automatic routing.

- Category and priority tagging
- Client and staff submissions
- File and context attachments

Assignment Engine

Auto-routing to responsible staff with SLA tracking, deadline enforcement, and escalation rules.

- Role-based auto-assignment
- SLA and due date tracking
- Escalation rules and alerts

Communication Thread

Full conversation history per ticket with internal staff notes and client-visible response threads.

- Threaded reply history
- Internal staff-only notes
- Email notification triggers

Resolution Tracking

Status updates, resolution time metrics, satisfaction ratings, and closed ticket analytics for continuous improvement.

- Resolution time analytics
- Client satisfaction ratings
- Ticket trend reports

Settings and Roles

Fine-grained access control, platform configuration, and role-based permission management for every user.

-  **Company and Branding Setup**
Logo, colors, business info, and localization
-  **Role-based Access Control**
Per-module permissions for all 4 staff levels
-  **Module Enable/Disable**
Toggle platform features on or off per organization
-  **Notification Preferences**
Email, in-app, and digest frequency controls
-  **Billing and Subscription**
Plan management and payment method settings
